Visual LISP Visual LISP is a registered trademark of Aspect Software. The LISP programming language was originally developed for the Aspect 4D extension tool for AutoCAD and Aspect 4D for Revit. In 1994, Aspect re-released LISP under the MIT License as Visual LISP for AutoCAD/Revit. Visual LISP for AutoCAD is now also available for 3ds Max. Visual LISP for 3ds Max is available for Windows and macOS. Visual LISP is also available for the Windows Runtime (WinRT). This allows

Visual LISP for AutoCAD/Revit applications to be integrated with the Windows 8 and Windows 10 systems and allows developers to create .NET applications for Windows 8 and Windows 10 devices. Visual LISP is an interpreted language and is generally used to control Autodesk applications. With Visual LISP, it is possible to add automation to any function of the application, and thus, perform tasks quickly without having to understand the code. With Visual LISP, it is possible to create extensions to Autodesk products and the user can see the source code of the extension. Extensions can be enabled or disabled. Visual LISP is a popular programming language, and the language is still in use. Visual LISP extensions can be written for any

Autodesk product and are written in Visual LISP, which is a registered trademark of Aspect Software. Autodesk also provides libraries of Visual LISP code for specific AutoCAD commands. Visual LISP for Revit has no version number, but it is similar to AutoCAD's Visual LISP. Revit API's are a set of Visual LISP code libraries that provide the ability to control Revit in an automated manner. Visual LISP can be used to create an environment within Revit that can be integrated with other Revit files. Visual LISP can also control other Autodesk products.
