The best way to easily determine disk space hogs. That's all you need to know about FolderUsage. With folder sizes going up, space gets tight and there is always the temptation to go looking through your file system to clean it up, but guess what, this only leads to more frustration and unnecessary troubleshooting. To make the cleanup process easy and cost effective, FolderUsage is here to answer your prayers and help you find those storage hogs. Easily locate file or directory that is eating space on your hard drive. Top Reviewed: Run Cleaner Free is an application that has been the number one choice of many users for several years. It has evolved several times over the years and is now updated every two months. As its name suggests, this software presents a user-friendly interface, with a nice attention to detail, a carefully crafted set of options and a very clean and easy to use user interface. In short, after launching the application, you need simply select the desired drive (e.g. C:), click on the 'Check' button, and then wait a while for the process to be completed. Depending on the drive size and the level of unneeded data, you will be able to get more or less detailed information, with the advantage of being able to quickly sort results by the size or the date of the entries. If you are using this application as an alternative to similar Windows utilities, you should also keep in mind that you can perform just about the same actions and gain the same results. Top Reviewed: Download Tool, which was released in 2012, is a software application that can be used to open specific file extensions in Windows. The main advantage of this is that you can define which file extensions you'd like to associate with certain programs (e.g., to open images with Photoshop), and then just double-click on a file of the intended format to open it with a particular program. Initially, you need to choose the type of files you'd like to set the association (e.g. jpg or gif), as well as the program you'd like to associate them with (by clicking the 'Add or Remove' button), and then proceed to double-click a file of the aforementioned type to add the association. The program can also limit the files that can be associated (by leaving them unlinked), preview the selected files, and can be used in conjunction with other

For more information, please visit the website or see the forum: In this tutorial, we will learn about how to put in a picture in any text and upload it to the web. There are few ways available to insert pictures into a web page. Adding an image to a web page is the most common way. After adding an image to the web page, you can upload it directly to a website or blog or to a folder

on the website and use that as a reference image in the future. Easiest method of inserting a picture directly into a web page is to paste a picture from a computer file. Open a file containing the image you want to use, using a text editing program like Microsoft Word. Do not forget to switch from the WYSIWYG to the HTML view. If using Microsoft Word, highlight all the text in the document and press CTRL+C on your keyboard. Choose File and then paste. Most often, when opening such a file, Word will open an HTML document. Using the HTML
