Your review will only be posted when we have received confirmation that it is genuine and not malicious. Submit Review Name: Email: Rating: 12345 Review: Security Code: Please enter the characters displayed in the picture. These characters are not part of the review. Please correct your entry at: Trigger Transaction on User to Update a record in Opportunity I have a custom button on Opportunity, that when clicked, will update a field on the Opportunity record. That is all working fine. I want to include a transaction in this as a record is updated, so I have created a Validation Rule. My question is how do I correctly write the SQL to update the field that will trigger a validation rule? Record Type: Account My trigger will update the Opportunity field, but I don't know how to include a transaction in this? For example: if(Opportunity.AccountId!= '000000000000') { //Update record type, account... etc } A: The below should help you out. trigger OpportunityTrigger on Opportunity (before update) { Opportunity oldopp = Trigger.Old; Opportunity newopp = Trigger.New; if(opp.ID!= newopp.ID) { if(newopp.AccountId!= newopp.AccountId ) { //Update record type, account... etc } } } Note: You would need to have defined a proper field for AccountId. If you are trying to update other fields from Opportunity Trigger, then you can use this instead. trigger Opportunity
